

EXTRICATION EXPRESS

**FEATURING THE
"EXTRICATION TOMAHAWK"
10 Tools in 1**

Featured Product

Now that all side windows will be made of laminated glass, Extrication Technicians can't simply shatter a side window, they will need to cut the windows the same way they cut a front windshield. The Extrication Tomahawk is the perfect tool for cutting laminated glass.

The Extrication Tomahawk is 10 tools in 1, and features a laminated glass saw and a hardened point for breaking glass and making purchase points.

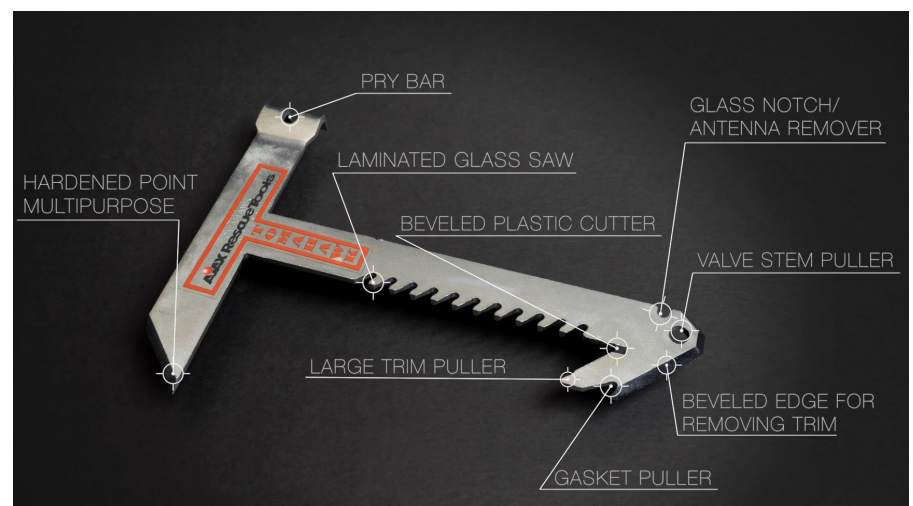

Watch the Tomahawk in action on our YouTube channel:

The Extrication Tomahawk 673-RT

The new federal motor vehicle safety standard no. 226 "Ejection Mitigation" is designed to reduce the partial and complete ejection of vehicle occupants through side windows in crashes, particularly rollover crashes, by using "laminated glass" in all side windows in 2018.

The Extrication Tomahawk can saw through laminated glass on both windshields and side windows. There's also a hardened point for breaking glass and making purchase points.

EMPLOYEE HIGHLIGHT

Bill Benedict

Bill Benedict has been involved in the Fire Rescue Industry for over 40 years, and has been involved in the development of several new and innovative tools that are used by Rescue Technicians every day. Bill has worked with fire fighters from all over the world to try and advance the knowledge of tools and techniques that are used to help in a rescue situation. Bill has also worked with Ajax Rescue Tools in the development of our full line of Auto Extrication Tools and was instrumental in the recent development of our line of Urban Search & Rescue, Structural Collapse tools.

In addition to all of this, Bill has attended hundreds of rescue training events and trade shows over his long involvement in the fire industry, and he is still planning to attend more in the future.

Bill has also been the recipient of many industry awards, including the Lifetime Achievement Award from N.A.V.R.A (North American Vehicle Rescue Association).

TRAINING EVENTS

"Crunch Time" Vehicle Extrication Training, Symposium, & Challenge

Ajax Rescue Tools supported this years "Crunch Time" Vehicle Extrication Training, Symposium, & Challenge hosted by Harlem Roscoe Fire Protection District (Illinois) in September 2018!

This three day event is geared toward new rescue personnel interested in obtaining vehicle extrication training skills. The event consists of a classroom session on Friday evening, a practical workshop on Saturday in vehicle extrication using both hand and hydraulic tools. Sunday's challenge consists of a sanctioned extrication challenge using hand and hydraulic tools on real world extrication scenarios.

The instructors are from around the USA and enjoy sharing there knowledge with the rescuers!

For more Information about next years "Crunch Time" please contact Mike Huffman at Harlem Roscoe Fire Protection District: hfrdmhuffman@gmail.com

"Attention Chiefs, you cannot find this type of hands on training for this kind of cost anywhere!!"

-Chief Joel Hallstrom from North Park Fire Department
