# Ajax Rescue Tools Supports EMS Roaddocs Illinois, NFP

Ajax Rescue Tools has a long tradition of supporting worthy organizations. One of these organizations is the EMS Roaddocs Illinois, NFP, and they stopped by the Ajax manufacturing facility recently. This organization started by bringing together EMS, and other medical professionals that also rode motorcycles to give back to their communities. Their primary goal is to promote and support local communities with motorcycle rides and other charity events.

They support our veterans (both past and present) by taking part in Honor Flight Chicago, Warriors Watch, and Patriot Guard Riders. The Warriors Watch will provide motorcycles for military units returning from war, deploying, and for individual warriors coming home or going off.

The Patriot Guard Riders attend the funeral services of fallen American heroes as invited guests of the family. The main goal of Roaddocs is to seek out opportunities and give back to the community. They believe in the adage "Pay it Forward".

We at Ajax Rescue Tools are proud to support this very helpful and supportive organization. Great work EMS Roaddocs Illinois, NFP.

# NEW PRODUCT

## Ajax 8250H High Pressure Regulator

### ADVANCED DESIGN

Smaller and lighter than our previous models.

### SIZE

Fits 4500 P.S.I., 5500 P.S.I. Air Cylinders

### COMPACT LAYOUT

Gauges are built in and recessed into the body for protection.

### USER FRIENDLY ARCHITECTURE

The side mounted knob makes it easier to adjust, with a more natural and safer hand/body position for adjusting delivery pressure.

### DURABLE CONSTRUCTION

Most regulators have multiple impact points. The Ajax 8250H regulator is designed with a single impact point configured to help protect elements critical to system integrity.

### SLAM TECHNOLOGY

Shock Limitation and Absorption Mechanism built into the adjusting knob helps protect vitals and reduces the chance of injury in the event of a cylinder accident.

### OUTSTANDING FLOW PERFORMANCE

Provides better flow control across a full range of cylinder pressures, with exceptional sensitivity in delivery pressure control.

# EMPLOYEE HIGHLIGHT

## Jim Szmanda

Jim Szmanda has worked at Ajax Rescue Tools for 6 Years, but his relationship with Ajax Tools goes back over 25 years. Jim, has been instrumental in helping Ajax Rescue Tools develop our library of Structural Collapse videos as well as the development of our Rescue product catalogs.

Jim has also taken part in many training events on Auto Extrication tools, as well as, Structural Collapse tools. Jim has experience working with very large departments as well as smaller departments, in the introduction of Ajax Rescue Tools, and has helped many individuals develop their understanding of rescue techniques. In addition, Jim has worked with several different branches of the military in helping to introduce the full line of Ajax Rescue Tools products.

Jim has developed skills in the Industrial, Construction, Rental, and Fire Rescue industries over his 35 years of working, and Jim looks forward to working with many more customers in the coming years. If you see Jim in the field, please feel free to stop him and say hello.

## TRAINING EVENTS

Ajax Rescue Tools was recently invited to The New York Preparedness Training Center in Oriskany New York to demonstrate and help train Structural Collapse and Auto Extrication!

**Structural Collapse**
